eKashu

eKashu is the highest value e-commerce payment solution currently available. Whether you are setting up a new enterprise or adding web payment to an existing business, eKashu solutions can provide you with easy to integrate, highly secure payment processing at exceptional rates.

what is it?

eKashu is an internet credit and debit card payment service, also known as a payment gateway. It is the secure link between your website and your bank, through which your customers' credit and debit card transactions will pass.

eKashu has been developed by CreditCall, an internationally recognised payment service provider with a solid reputation for innovation and reliability. The service is operated on a worldwide network of four processing nodes with multiple redundancy, and the entire operation is PCI DSS Level 1 certified (Payment Card Industry Data Security Standard).

the eKashu products

- **eKashu Payment Page.** Simple outsourced web payment that can be implemented very fast, with just a few lines of code.
- **eKashu Direct.** Integration of the CardEaseXML payment protocol directly into the merchants website.
- **eKashu WebMIS.** A comprehensive web-based reporting system to monitor transactions and produce reports. It also allows a merchant to process telephone or mail order transactions.
- **eKashu Virtual Terminal.** An addition to WebMIS allowing manual transactions to be entered for mail order / telephone order (MOTO).

the key benefits

- **Affordable transaction processing.** Benefit from our simple “per transaction” pricing with no annual fees and no hidden charges. Our rates are the best value in the industry.
- **Simple integration process.** You can start trading in about 7 days with our simple integration process.
- **Free technical support.** Knowledgeable real people answer the phone to support your business - no premium rate support lines.
- **Easy to use reporting.** We give you the tools to effectively manage orders and reconciliation through our administration and reporting area.
- **Highest levels of security.** Outsource security to us to give your customers confidence that their details are secure.
- **Fraud prevention.** You can ensure that your business is protected as far as possible from fraud, with optional fraud profiling services.
- **Reliability and availability.** Our network infrastructure and disaster recovery procedures ensure solid reliability.
